

ARCONIC

The BobTail[®] Tooling System

BobTail® Tooling, Made Better

For Years, BobTail Tooling Has Helped Revolutionize How Fasteners Are Installed

Now, the BobTail® Tooling System is even better with the introduction of new tools designed to deliver even easier, more efficient fastener installation. Each of the new BobTail installation tools helps deliver Arconic Fastening System and Rings' famous level of vibration resistance for long-term performance and reliability, representing a true revolution in fastener installation technology.

Lighter Weight Designs

For difficult-to-reach areas, these new tools are more compact and lighter weight than previous legacy options.

Fewer Nosepiece Components

The new models require only 3 nosepiece components, in contrast to 20 or more in previous legacy models. Fewer to change out. Fewer to keep in stock.

Shorter Nosepieces

Lower Cost

Some new models are priced lower than current BobTail tools, which helps eliminate the cost penalty of upgrading to new models.

Limited Lifetime Guarantee on New SWAGEFORWARD® Tools

Safer, Quieter Operation

New BobTail SWAGEFORWARD® tools are designed to be safer and quieter than current models.

Available From Stock

New models are in stock, and available quickly. Original BobTail tooling is still available, made-to-order.

The new models require only 3 nosepiece components.

The previous models required 20 nosepiece components.

The Familiar Benefits

All the best features of BobTail tooling are still available in new BobTail SWAGEFORWARD models:

- Easy to use, almost no training required
- No pintail breaks; safe and quiet
- Eliminates hearing damage and repetitive stress syndrome
- Collar cutter tool allows easy removal of an installed fastener
- Quick and easy visual inspection to verify installation (optional swage gauges available)
- Designed and manufactured at the Arconic Fastening System and Rings facility in Kingston, NY
